Professional Summary

.Net Developer with 5+ years of experience architecting scalable enterprise applications and delivering measurable business outcomes. Proven ability to lead technical initiatives and collaborate effectively with stakeholders to achieve project objectives. Skilled in C#, ASP.NET Core, SQL Server optimization, and RESTful API development. Successfully reduced system response times by over 40%, resolved critical errors, and improved operational efficiency across multiple projects.

Technical Skills

Languages & Frameworks: C# • ASP.NET MVC • ASP.NET Core • .NET Framework • ABP Framework

Database & Backend: SQL Server • T-SQL • Stored Procedures • Database Optimization • RESTful APIs

Tools & Technologies: Git • Azure Boards • OAuth 2.0 • JWT • Microservices

Web Technologies: HTML • CSS • JavaScript • Web Services • SOAP • JSON • Responsive Design

Work Experience

Sep 2024 – Present

.NET / IT Developer | Texas Equipment – Sharjah, UAE

- Spearheaded e-commerce platform overhaul for 2,500+ SKUs, integrating advanced search and filters to increase engagement by 40% and conversions by 30%.
- Directed cross-border software deployment between the UAE and the USA, coordinating with international teams to install over 150 applications across 80+ automotive companies, optimizing system rollout efficiency.
- Engineered the TIS inventory management system for tracking 3,000+ SKUs with automated reorder alerts, eliminating 85% of manual errors while mentoring five staff members on effective system utilization.
- Pioneered TQS quotation system, partnering with sales department to accelerate quote preparation time by 70% and enhance accuracy.
- Orchestrated digital marketing campaigns across LinkedIn and Meta Ads, partnering with the design team to generate 250+ qualified leads and increase website traffic by 60%.

Aug 2023 – Jan 2024

Back-End Developer | Intology – Remote

- Streamlined Flexia WMS database queries and integrated RESTful APIs with caching mechanisms, slashing response time from 800ms to 480ms through collaborative code

reviews with senior developers.

- Implemented error handling framework, eliminating 75% of system crashes and supporting 200+ concurrent users while documenting best practices for team adoption.
- Architected microservices infrastructure with JWT authentication and containerized deployment, achieving 99.2% uptime and 4.0/5.0 user satisfaction by facilitating knowledge sharing sessions with development team.
- Orchestrated Agile workflows with Azure Boards, delivering 12 releases on schedule and reducing post-deployment bugs by 45% through cross-team coordination.

Sep 2018 – Jan 2023

.NET Developer | Robotic Mind – Latakia, Syria

- Engineered 5 full-stack applications including e-commerce platform processing \$50K+ monthly transactions and booking system managing 500+ appointments, collaborating with UI/UX designers and business analysts.
- Redesigned database architecture to 3NF with 50+ optimized stored procedures, accelerating load times from 4.5s to 900ms (80% improvement) by initiating comprehensive performance audit.
- Architected and deployed high-performance RESTful APIs to support native mobile applications (Android/iOS) for warehouse inventory tracking, handling real-time data sync for 10,000+ items
- Transformed repair shop operations by integrating eCommerce capabilities, automated SMS reminders, and an electronic invoicing system, increasing revenue by 35% and cutting customer no-shows by 50% through stakeholder collaboration and process optimization initiatives.

Key Projects

- **Flexia WMS:** Comprehensive warehouse management system boosting processing speed by 50% and inventory accuracy by 60%.
- **Marten Do:** Admin dashboard and delivery app managing 2,000+ monthly orders with 25% efficiency gain.
- **Albasheer:** Real-time inventory dashboard with Telegram notifications for 2,000+ items, improving response rates by 50%.
- **TIS & TQS:** Custom inventory and quotation systems with role-based access, audit logging.
- [Portfolio](#): Interactive showcase of 7 real-world applications built with HTML, CSS, and JavaScript.

Education

Master of Web Sciences (In Progress) | Syrian Virtual University | Feb 2024 – Present

Bachelor of Computer Science, Software Engineering | Tishreen University | Sep 2015 – Sep 2023

Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering

Languages

- **Arabic:** Native
- **English:** Intermediate (Professional Working Proficiency)
